Your Task

- Write an ARM Assembly language program to perform the summation of the elements of an Array.
- Write a Cortex-M4 assembly language program to reverse an Array.
- Write a Cortex-M4 assembly language program to find the largest and smallest elements of an array.
- Write a Cortex-M4 assembly program that computes the element-wise sum of two equal-length arrays and stores the result in a third array.
- Write a Cortex-M4 assembly program to determine whether a number or a string is a palindrome or not.

Submission Guideline

- 1 Your Assembly code with proper comments. (*.s file) A
- 2 document (*.tex file) that contains:
- 3 Detail explanation of the code
 - Screenshot that shows the state of the system after the code has been loaded.
 - Screenshot that shows the situation after the code has been executed.
 - Submit as a .zip file. Example: your classroll lab#.zip (12 lab2.zip) _
